

The World's Productivity Cloud

The Evolution of the Modern Workplace

The digital revolution has impacted every facet of modern life and has dramatically impacted how we work. Workers are no longer restricted to only working from set office locations or company- owned desktops. The modern employee expects a workplace that has greater flexibility and the ability to access information from anywhere. However, this modern workplace has placed increased pressure on information security.

A More Robust Solution for the Digital Workforce

Modern-day workplace flexibility is a hugely beneficial development. However, there are also challenges in terms of security and cloud mis-management including:

- Accessing emails or company information on the go.
- Companies face a trade-off between empowering their employees and protecting company data.

Introducing Microsoft 365, Microsoft's solution places the user at the centre of the online universe. In doing so, it brings together all devices, apps and data into a single, more robust, cloud solution.

Modern Workplace Vision Powered by Microsoft 365

Microsoft 365 is an integrated platform that brings together **Office 365**, **Enterprise Mobility** and **Security (EMS)** and **Windows 10**. EMS is an intelligent security and management platform that is designed to help companies further empower employees while increasing security.

With **Microsoft 365**, by integrating technology into every aspect of the workplace, **organisations can evolve in ways not previously possible.**

Collaboration

Collaborate in a central hub for chat, meetings, calls, and content with Microsoft Teams. Easy to execute video conference calls brings your team closer together, no matter the location.

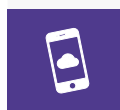

Productivity

Office 365's suite of productivity apps including Word, Excel, PowerPoint and SharePoint allowing for frictionless collaboration between your team.

Security

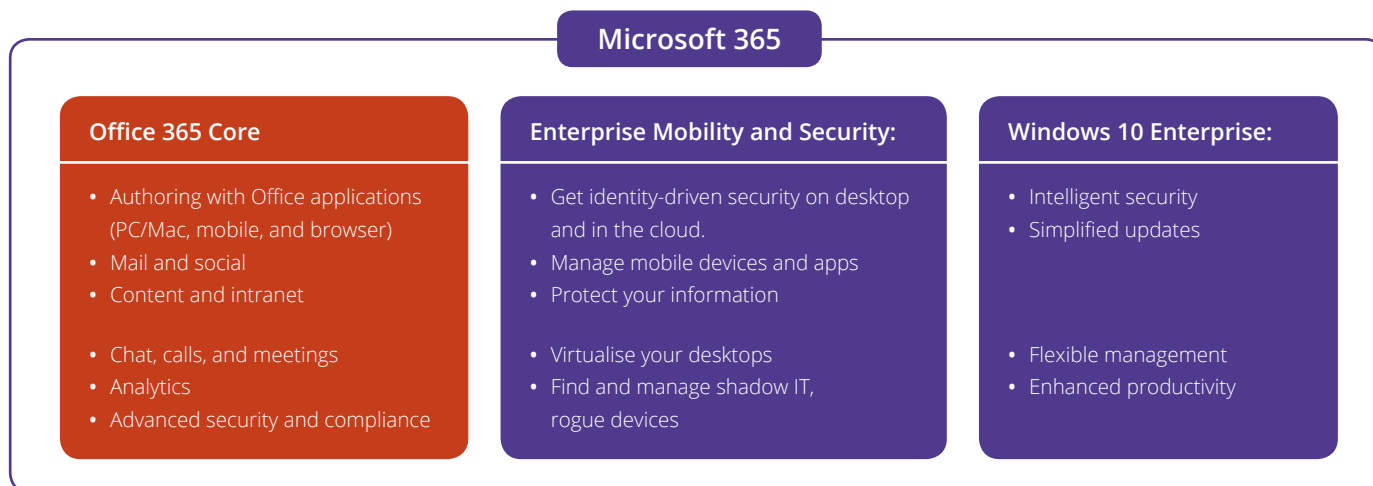

Defend your digital landscape with Microsoft Threat Protection and Cloud App Security. Users can access information securely with Azure Active Directory (AD) and identity protection.

Mobility

Work securely from anywhere using the power of the Azure Cloud combined with EMS.

Microsoft 365 is the World's Productivity Cloud, Securely Connecting People, Data and Systems.

Cost-Saving Opportunities with Microsoft 365

Operational Efficiency - Travel and location costs reduced through online collaboration. Employee efficiency increased by several hours each week through efficient online meetings.

Reduced IT Administration Costs - Streamline IT management and experience cost reductions from people, hardware and administration.

Reduction in End User Security Events - Reduced risk of a security breach equates to lower security solution costs. Compliance Manager allows for decreased compliance costs.

Long Term Return on Investment - Cost reduction of on-prem hardware and maintenance over time combined with a more effective workforce.

Enhanced Cloud Security

ActionPoint has already helped hundreds of organisations move to the Azure Cloud and transform productivity capabilities with the Office 365 suite. With Microsoft 365, ActionPoint is helping clients to create an ecosystem that revolutionises how businesses operate and compete. The safety of the integrated cloud solution is built on four principles.

Security - The guiding principle of Microsoft's security strategy is to "assume breach" and prepare for all eventualities. This comprehensive approach helps protect your data wherever it may be.

Compliance - The most comprehensive set of compliance offerings of any cloud service provider, backed by a commitment to staying up-to-date on new standards and regulations.

Privacy and Control - Microsoft 365's policies and processes help keep your data private and in your control.

Transparency - Microsoft provides clear information on how and where your data is stored and secured.

Working With ActionPoint

As a Microsoft Gold Partner, ActionPoint has vast experience in helping organisations integrate with Microsoft 365. Our team can help you undertake a seamless transition into utilising cloud solutions.

For current Office 365 users, it makes sense to continue your digital evolution by moving to a **more secure, integrated solution.**
